

Making history for a brighter future...

On June 23, 2006, history was made when the Nuclear Regulatory Commission, for the first time, issued a license to LES to construct and operate a uranium enrichment plant in Lea County, NM. The National Enrichment Facility is the first major construction to occur in the US nuclear industry in 30 years.

LES is focused on providing safe, cost effective and reliable uranium enrichment services for US power plants within a framework of high environmental, social and corporate responsibility standards.

PAVING THE WAY FOR A BRIGHTER FUTURE.
